Wanna Go

Ninjas With Syringes

WANNA GO (official lyrics)

Get out of my head
I'm better off being unleaded
Sometime you've got no place to go
Bad advice best left unsaid
Don't want to wait until I'm dead
Sometimes it comes down to who you know

There's no earning or learning until you've tried
It's not so sink or swim, more like fight or die

Why is it only under the bright lights I feel free?
In the night time in the city I believe
And the only things I ever really need to know
Are who I am, who I was, and where I wanna go-

A little further down the road
You probably won't do what you're told
There's no knowing what could be best for you

And even though I try to realize
What it really means to be alive
It won't stop me from trying to see

I'm a diesel drinkin sunnuvabitch
I got a heart that just won't quit
I get my breakfast down at Woodrow's Cart
Cause it's a damn fine place to start

And it's a damn shame isn't it though?
These cold, gray streets we know
We can watch the cops pull over hipsters
As we go trippin half-passed stoned

So much of the day
Wasted in that grey
Spaces between want and action
Between the first step
And losing traction

What passes us by in the moments we looks away-
