

Satellite

Backstreet Boys

Here I am again
Waiting on the moment you decide
To leave me stranded on the edge of nowhere
I've been so close to you so many times
I feel like I could drown
I wish that I could fly away from hereAll:
But Im still coming downAJ:
From the last timeAll:
That you came aroundAJ:
In the starlightAll:
Now Im pulled into your gravity
Spinning helplessly
Im falling through the night
Like a lonely satelliteAJ:
Like a lonely satelliteNick:
We walked on Jupiter
Flew around the moon a time or two
Left a mark on every star we could find
But now Im burning like a meteor
That never hits the ground
Wish that I could fly away from youAll:
But Im still coming downAJ:
From the last timeAll:
That you came aroundAJ:
In the starlightAll:
Now Im pulled into your gravity
Spinning helplessly
Im falling through the night
Like a lonely satelliteNick:
Love is poisoning the atmosphere
Is keeping everything unclear to meHowie:
Something in your eyes
Never satisfies
Im feeling so alone, tonightAll:
But Im still coming down (still coming down)
From the last time (the last time)
That you came around (you came around)
In the starlight (the starlight)
Now Im pulled into your gravity (ooooh)

Spinning helplessly
Im falling through the night (falling through the night)
Yes Im falling through the night (falling through the night)
Like a lonely satelliteNick:
Like a lonely satellite
