

Move On

KMFDM

Reflect in a mirror
Revenge is redundant
Resurrect your idols
Return to the basics
Relocate to zero
Reverse into backwards
Repossess your soul
Now is the time
Reassess your values
Going back to the basics
To powerful needs
At the end of the day
It's an incredible siege
We are ready to rock
Get in the groove or die, or die, or die
My inner circle's helter-skelter
Echoes loving ecstasy
I know I'll find a way to live
A way for you and me
Stuck in the past
with your blood-sucking sadness
Don't pretend understanding
Understand independence
We got to move on
Move on again
A generation of madness
Is growing again
Right on the edge
Of a nightmarish war
Roaming the land
Like never before
Saving yourself now
The trouble of having
The details of ending
Like in the past
Introducing the power
Of surviving the contest
Believe in your own strength
Now is the time
My inner circle's helter-skelter
Echoes loving ecstasy
I know I'll find a way to live
A way for you and me
Does it really matter what you believe
Does it really matter if you belong
Does it really matter what you believe
Does it really matter if you belong
Does it really matter what you believe
Does it really matter if you belong

Does it really matter if you belongDoes it really matter what you believe

Does it really matter what you believe

Does it really matter if you belong

Does it really matter if you belong
