Venomous Lipstick

Calico System

You better run, you better hide
Lock yourself inside, you can't protect yourself
She's got a gun, she got a knife
A vicious mind, no heart that I can tellShe felt trapped by his threats and
scars she won't forget until it's over
His violent temper came from hate
Would be his last mistake when it's overShe'll rip your heart out babyShe's driving out to nowhere
to hide the crime and bury him tonight
There's a difference in her eyes now
Mascara tears run down her face
The only proof this happened here tonightOne night he grabbed her by the hair
Threw her to the floor, now it's over
She's sick of his violent ways
Tonight's the night it ends and now it's overShe'll rip your heart out babyShe's driving out to nowhere
to hide the crime and bury him tonight
There's a difference in her eyes now
Mascara tears run down her face
The only proof this happened here tonightAnd in the blink of an eye your whole world changes
As it happened before, it'll happens again
"I'm not gonna be submissive," she said
"The only way out is straight through you"Whoa, gave him his last embrace
Whoa, she'll rip your heart out baby
Whoa, gave him his last embrace
Whoa, she'll rip your heart out baby
Whoa, gave him his last embrace
Whoa, she'll rip your heart out babyShe's driving out to nowhere
to hide the crime and bury him tonight
There's a difference in her eyes now
Mascara tears run down her face
The only proof this happened here tonightShe's driving out to nowhere
to hide the crime and bury him tonight
There's a difference in her eyes now
Mascara tears run down her face
The only proof this happened here tonight
