

By My Side

Kasabian

Come on by my side
Come on, both sides
Come on by my side
Come on, both sides "Step out of the shadows", said the children to their state
You create these armies just to keep them from their fate
No communication as the masses cheat and steal
Stars in constellation, now I know that's who you are Come on by my side
Come on, both sides
Come on by my side
Come on, both sides
Come on "No retaliation", said the poet to his kin
Separate the idols and commit your deadly sin
And all this put aside, wanna finish what you start
I'll connect the numbers, you protect my heart Come on by my side
Come on, both sides
Come on by my side
Come on, both sides No communication from the poet to his kin
Separate the idols and commit your deadly sin
No communication, wanna finish what you start
I'll connect the numbers, you protect my heart Come on by my side
Come on, both sides
Come on by my side
Come on, both sides
