

Kiss of the Scorpion

Monster Magnet

Judy walking down the highway
You're coming into your home
As you drown in your pool of madness
You're never gonna be alone
That's why I'm here, in here Look up child, and love your savior
The scorpion's in my eyes
It's time to strip our souls naked
The freedom of all disguise When you take me aside
To become an immortal
The warmth of the flesh now
Are gonna set you free You'll swim in the sweat of a million orgies
You'll live in the fire of a sweetest hell
And bear your soul to the rays of a mortal sun
Give your lips to the kiss of the scorpion I ain't the Creator and I ain't Satan
I come from another place
And trust with me your fingers, baby
There's eternity on my face This world ain't big enough
For your questions
I deal with the stars now
Just to get you right It's time you sucked
The cock of the Fire God You'll swim in the sweat of a million orgies
You'll live in the fire of a sweetest hell
When you bear your soul to the rays of a mortal sun
And give your lips to the kiss of the scorpion You'll swim in the sweat of a million orgies
You'll live in the fire of a sweetest hell
Bear your soul to the rays of a mortal sun
But give your lips to the kiss of the scorpion The scorpion
The scorpion
The scorpion
