Mind Your Head

mininome

You wanna be in the headline your name in black and white
You wanna go for the big time can't shake the feeling
You wanna walk in the limelight and take the road by storm
You wanna reach for the highlight and be the new thingI told you from the start
There's nothing wrong with what you said
But deep inside my heart I wanna tell youMind your head get out of bed
Don't realize your own demise
You gotta redefine your state of mind
So take aspirin the word has said you gotta mind you headYou wanna be with the best of as long as you're in there
Somebody nobody heard of who made the big time
You wanna see what you can do when running side by side
You wanna know will you get through and make the headlineBut if you want to learn then everything will be alright
Take on what's in the word don't let it feed youMind your head get out of bed
Don't realize your own demise
You gotta redefine your state of mind
So take aspirin the word has said you gotta mind you headGet out of bed don't realize your own demise
You gotta re-define your state of mind
So take aspirin the word has said you gotta mind your head
You gotta mind your headI try to tell you how it is but you still disagree
When will you ever see how faithfulness should beMind your head, realize
Be in the headline go for the big time
Walk in the limelight
Be in the headline go for the big time
Walk in the limelightMind your head get out of bed
Don't realize your own demise
You gotta redefine your state of mind
So take aspirin the word has said you gotta mind you headGet out of bed don't realize your own demise
You gotta re-define your state of mind
So take aspirin the word has said you gotta mind your head
You gotta mind, you gotta mind, you gotta mind your head
