Kaye

Jupiter Sunrise

Kaye, are you even real?
Do you think that maybe we could be lovers once in a while?
Say something I can feel
I am never here and it's impossible to healGo ahead and understand me underneath that killer blue sky
Go ahead and understand me pleaseKaye, are you even real?
Do you think we'll ever figure it out, I'm running out of hope
Say anything you feel
Maybe you can do it for the both of us and I'll untie the ropeGo ahead and understand me underneath that killer blue sky
Go ahead and understand me pleaseKaye, out there in the world I am full of their hate, their crime
In here it's like we can be pure of heart
Out there in the world I am left for dead don't help me
In here we are both light and pure of heartIt's hard enough to breathe right here
Let alone be right here, let alone here you say, "Love"
It's hard enough trying to be strong right now
I try to be wrong right now
I try to be anything that doesn't scare her awayKaye, out there in the world I am full of their hate, their crime
In here it's like we can be pure of heart
Out there in the world I am left for dead don't help me
In here we are both light and pure of heart
Pure of heartKaye, are you even real?
Do you think that maybe we could just stay here?
