

# Love Never Lasts

Jill Ledet

That moment of eternity to keep with you always  
when the moon is full you'll see  
will not be like those days.

That moment of eternity moment in time no plans to lose, just that moment in time to last for eternity.

You can't wipe away the memories or uncry the tears those days have buried themselves away  
like the sun going down in the hazy mist you never forget, and you think it will never come again, until one day  
when you're not looking and let yourself feel again and those days and the sun going down come up like a  
fountain that won't shut down, and you think it's a dream and it's not going to last  
and so you take it in and leave it  
cause you never want to go through that again.(Chorus)

Cause love never lasts not like that,  
so close it fills your soul feels like the first time  
but you take it in  
the walls come crumbling downSelf hidden inside he like you the same that moment of eternity to keep with  
you always  
perfection forever in your mind  
and you say those things you would never say  
you take your winnings and leave with the magic you've learned the hard way that  
(Chorus)

Love never lasts not like that  
so close it fills your soul  
feels like the first time  
you take it in  
the walls come crumbling downYou don't want to lose it this time  
farther but closer as easy as it came  
never want to hurt that way again when all the things you knew hurt so deep you remember how he left you  
those days you never forget  
something about that touch  
you'd never thought you'd feel again  
crept in from the miles  
of running no where else to run  
recovered deep in your soul  
your looking in the mirror at you  
(Chorus)

Love never lasts not like that  
so close it fills your soul  
feels like the first time  
but you take it in  
the walls come crumbling down
