

# Black Sky

## Elliot Matsu

I want to be with you, you know that I do  
But theres nothing I can do to keep you around  
I always knew theres power in you  
And one of these days it would all shine through  
In one of these ways itll all shine throughUnder a black sky I can hear you calling out my name  
And just like an asteroid, our light just burned out into space  
No matter how we try, this gravity keeps us in our place  
But under a black sky all we have is changeOur little talks spin round in my head  
So many words but nothing said  
You know your loss, but I bear the cost  
Only so many secrets I can keep  
But I love you more than you can seeUnder a black sky I can hear you calling out my name  
And just like an asteroid, our light just burned out into space  
No matter how we try, this gravity keeps us in our place  
But under a black sky all we have is change
