

Anyday

Ani DiFranco

I will lean into you you can be the wind
I will open my mouth and you can come rushing in
You can rush in so hard and make it so I can't breathe
You know I breathe too much anyway I can do that anyway
I just wish I knew who you were
I wish you would make yourself known
You probably don't realize I'm her
The woman you want to call home
I'll keep my ear to the wall
I'll keep my eye on the door
Cause I've heard all my own jokes and they're just not funny anymore
You know I laugh too much anyway I can do that any day
Have you ever been bent or pulled have you ever been played like strings?
If I could see you I could strum you I could break you make you sing
I guess you can't really see the wind
It just comes in and fills the space
And every time something moves you think that you have seen it's face
I've always got my guitar to play but you know that I could do that any day
