

Every Breath

[Tracy Bonham](#)

I see you runnin' and it's all over now
The devil's comin' and he's showin' us how
He's goin' down on the street light
It's such a cool sightThe lizard king is here and where are you now?
The monkey brain is here, he's showing us how
He's goin' down on the cool right
And I am loosing sightAnd every breath is like the one before
Yeah, it's like the one before
You get it right, you breathe no moreSold my shadow on the blackest of nights
Sometimes it pushed me right out of the light
It's going down on the cool, right and I am losing
You're here to tempt me and it's all I can doTo keep from running just to try something new
I'm goin down on the cool ride
And I am right behindAnd every breath is like the one before
Yeah, it's like the one before
You get it right, you breathe no more
No more, no more, no moreEvery breath is like the one before
Yeah, it's like the one before
You get it right, you breathe no moreOh and every breath is like the one before
Yeah, it's like the one before
You bank on it, you breathe no more
No more, no more, no more
