Take This

Gemini Syndrome

A stranger asks me: "where you coming from?"
I say: "I don't know..."
Well where you going? Surely I'm going home?

Like everything, we rise and fall away
Just as the ocean lives and flows each day

I'll take you away from your nightmare!
If only you would come with me!
I want to show you a better way, take this

A stranger stops it, and offers me a gift
And says: "Take this please..."
I never wanted anything more, the pressure brings me to my knees

Like everything, we rise and fall away
Just as the ocean lives and flows each day

I'll take you away from your nightmare!
If only you would come with me!
I want to show you a better way, so you and I will finally be free!
Won't you please take this?

I'll never lived a life I wouldn't die for!
But I guess its all the same!
The dream is still alive while your not dreaming!

The dream is true
The dream is true

As flawed as you may think you are, your perfect to me!
Crawl inside the hole in my heart and we will never live!
(Take you away)

I want to show you a better way, so you and I will finally be free!
Won't you please, so you and I will finally be free!
Won't you please, take this!

Take this!
