

To Me (With Leigh Nash)

Matthew West

Well it breaks my heart
Every time I see the world breaks yours in two
You know those lies ain't true
But when you let 'em get to you
Being you is hard to be
I see These days sticks and stones
Sound like paradise compared to those harsh words
They'd rather cut you down than hold you
But they don't know you like I know you
If they did I know they'd see
Yes they'd see To me you are
Heaven's finest invention by far
So much brighter than the brightest star
What I'd give to make you see
Who you are to me All your so called friends
Said they'd be there 'til the bitter end
Are gone But I won't be just like the others
I'm gonna show you my true colors
You can't ever make me leave
No, no, I won't ever leave To me you are
Heaven's finest invention by far
Even brighter than the brightest star
What I'd give to make you see
Who you are to me When you laugh it's my favorite song
And all the gray is gone
Every single time I see you smile
I just haven't seen it in awhile So go on and dream
Bigger dreams than this town's ever seen before
There are just two kinds of people
One who say they are not able
And ones who change the world
And you're gonna change the world To me you are
Heaven's finest invention by far
Even brighter than the brightest star
What I'd give to make you see
Who you are to me
To me
