Single To Mingle

Mint Condition

I spotted that smile across your face
From across the room, my memory can't erase
My heart exceeded its normal pace
As oxygen takes a violent haste from my face
Time and time again, it's agreed that we are friends
Then I awake, awake from my daydreams
Speaking all the time, there was something on my mind
Listen to my heart beats begin
If you're single to mingle
I'd love if we could do the town
There's a love that could be found
If your single to mingle
I'd love if we could do the town
There's a love that could be found, found
When I lay me down to sleep
I close my eyes and all I see is you
Happy thoughts of us in a deep romance
You and I dancing close with our eyes in a trance
Time and time again, it's agreed that we are friends
Then I awake, awake from my daydreams
Speaking all the time, there was something on my mind
Listen to my heart beats begin
If you're single to mingle
I'd love if we could do the town
There's a love that could be found
If your single to mingle
I'd love if we could do the town
There's a love that could be found, found
