

# Wolfie (feat. Julia Stone)

## Golden Features

I never drift down on this old road  
Walking around in your new car  
I'll stay, I'll stay, find what you're needing  
And I'll stay, I'll stay watching you breathing  
Fly to my open arms, dreaming about what you've become  
All that I can do is lay and waiting for you to come now  
I'll stay, I'll stay  
Watching you breathing  
I'll stay, I'll stay  
Watching you breathing  
For ever and ever and ever and ever and ever  
For ever and ever and ever and ever and ever  
Lights move in your eyes  
Trying see who you're gonna, what you wanna be  
Shapes and the sounds keep going round  
You're never alone, no, you're never alone  
I'll stay, I'll stay find what you're needing  
And I'll stay, I'll stay watching you breathing  
Fly to my open arms, dreaming about what you've become  
All that I can do is lay and waiting for you to come now  
I'll stay, I'll stay  
Watching you breathing  
I'll stay, I'll stay  
Watching you breathing
