...and The Rest Will Follow

Project 86

And crucial context pressure drops
Unknown heights, I am, I was, am I was
The absolution north in the
Whitewall squall here is your why, is your why
Rest never to late to recreate
Recreate, I'll meet you in, meet you in
Will desperation, exit scene

In cold relief
Follow the hand, the furnace, the straight face
Hand, the furnace, the straight face
Hand, the furnace, the straight face
Hand, the furnace, the straight face
