

Space Baby

This Frontier Needs Heroes

Space Baby, Space Baby
Send them off to Jupitar
all by themselves There's nothing left on earth to do
we polluted all our kisses too
miles and piles lie their wasted No one to take care of you
so we'll send you off to a little moon
where the stars aren't so shimmery Space Baby, Space Baby
Send them off to Jupitar
all by themselves I got tired of yelling
so the people just blew up instead
they got tired of living now they're dead They took the last space shuttle
dont forget your bottle
sorry we didn't do better instrumental You'll probably get their in 20 years
How about just one last hug dear
hopefully you will hear, all our warnings Good luck
Read a book
to pass the time
you'll wanna know where we went wrong
so you can sing a different song. Space Baby, Space Baby
Send them off to Jupitar
all by themselves
