

# Wake Up (Original Mix)

## Waldeck

There's a guide to take me home  
Led me through the night  
Stood against the storm  
And taught me pride Did they weigh you down?  
Did they boil the salt?  
Did they mess you up  
In your fancy loft, baby? There's a smile that broke my heart  
That sparkles in your eyes  
You're falling apart  
Now you're living lies Did they change the rules  
Without telling you?  
What a surprise  
Who needs who now baby Take a break and come down  
Take a chance and start  
Take a look in the mirror  
Take the pill to wake up Take a break and come down  
Take a chance and start  
Take a look in the mirror  
Take the pill to wake up Take a break and come down  
Take a chance and start  
Take a look in the mirror  
Take the pill to wake up Wake up There's a spirit of our youth  
Won't solves your thoughts  
Used to care about truth  
And fight against the odds Did they make you trade  
The dreams of old  
Did they tell you  
It was cool to be cold baby? There's a light that you once shown  
Clouded you la don  
Everything is lone  
And everybody is gone Was life rough on you  
Did it fit no more  
As we fibbin' you to my dorm  
Now baby Take a break and come down  
Take a chance and start  
Take a look in the mirror  
Take the pill to wake up Take a break and come down  
Take a chance and start  
Take a look in the mirror

Take the pill to wake up If you need someone  
To [Incomprehensible] night  
You can count on me  
Everything will be, alright Alright If you need someone  
To [Incomprehensible] night  
You can count on me  
Everything will be, alright
