

Choking Tara

Guided By Voices

Days into weeks she rattled my mind
We stayed out all week got happy this time
She fills empty space kinda need it that way
Crybaby says bye to me Can't imagine that all our troubles will go away
And I could catch her and break the falls
I could snatch her with beaks and claws Today when every fake it decides to make it
They just can't take it away
Shove it, 'cuz I'll just stay like an ugly unwanted stray
Don't care what you say
