

# Love Unconditional

## Human Nature

Some may say it's a mystery  
Some may say it's a science  
But I believe that somewhere  
Between desire and the senses  
The truth may lie I'll give you love unconditional  
We have love unconditional I won't try explainin' the effect you have on me  
Admit it girl, the truth is plain to see  
I gotta have your decision, so don't give me the party line  
Face the facts, It's make your mind up time So give you heart permission  
For gettin' here with me  
Baby remember right now  
If you just surrender  
Embrace your destiny I'll give you love unconditional  
It's a heart and soul reunion  
That's the way it's meant to be We have love unconditional  
It's a two way love communion  
So set your spirit free What's the point in pretending, I don't want nobody else  
I can't lie, I can't fool myself  
No time for hesitation, I gotta make you hear somehow  
The chance is here, I know the time is now So give your heart permission  
For gettin' here with me  
If you just surrender  
Embrace your destiny I'll give you love unconditional  
It's a heart and soul reunion  
That's the way it's meant to be We have love unconditional  
It's a two way love communion  
So set your spirit free Some may say it's a mystery  
Some may say it's a science  
But I believe that somewhere  
Between desire and the senses  
The truth may lie I'll give you love unconditional  
It's a heart and soul reunion  
That's the way it's meant to be We have love unconditional  
It's a two way love communion  
So set your spirit free Every night, every minute of the day  
Every thought and everything you say  
Every time you walk away I'm with you
