In Between

Simian

So we'll run away, away from what we've done
And I'll see you, when black skies turn to blue
And when we'll fall our eyes will see it all
A glimpse of in betweenOnwards we walk to who knows where
Don't stop or get weighed down by care
In circles we move from here to there
Just keep on goingI just don't want to know, how I came to arrive here
We should try to resolve, we should try to belong hereLearn the land, like skin, it binds and keeps you in
Your mind is full, is full of what you do
And when we'll fall our eyes will see it all
A glimpse of make believeOnwards we walk to who knows where
Don't stop or get weighed down by care
In circles we move from here to there
Just keep on goingI just don't want to know, how I came to arrive here
We should try to resolve, we should try to belong hereI just don't want to know, how I came to arrive here
We should try to resolve, we should try to belong here
