

# Clue

## Hazzard Hotrods

Do you have a clue? You don't have a clue I've seen you talking with your friends, friends  
Clever young jokes in a world that never ends, ends  
All the stars in the sky, just crossed your eyes  
All the blood to your brain is in vain, is in vain Walking up the steps with the lies behind your lips  
All your stupid friends love you for your mind  
I've seen you, perfectly designed, don't make me smile  
Don't make me smile, all you thoughts are perfectly unkind Don't make me smile, all the stars in the sky  
Just crossed your eyes, all the blood to your brain  
Is in vain, is in vain Don't make me smile, don't make me smile  
All the stars in the sky just crossed your eyes  
All the blood to your brain is in vain, is in vain
