What I Wouldn't Do

Justincase

Wipe the residue before it's too late girl
And start your step again before you fall down now
Bear the load until you can bear down on the loaded
Sling your rock and hit the love that you've been missingWhat I, what I, what I wouldn't do
To wipe all your pain away?
What I, what I, what I wouldn't do
To walk the road you've walked along?If you looked here, would it be too much to ask?
If you looked where you have been glancing past
All those boys who have been here for you
What I wouldn't doPeel the layers and take your test this moment
Hold your head high and stare down all the twistedWhat I, what I, what I wouldn't do
To wipe all your pain away?
What I, what I, what I wouldn't do
To walk the road you've walked along?If you looked here, would it be too much to ask?
If you looked where you have been glancing past
All those boys who have been here for you
What I wouldn't do?Even though you're used to leaving things
I just wanna be the last one goneIf you looked here would it be too much to ask?
If you looked where you have been glancing past
All those boys who have been here for you
What I wouldn't do for you?
