Little Dipper

Fila Brazillia

If we both stand with with paths on high
And sink without the oceans, watch 'em dry
We can see far to the other side
It's you and I forever, we don't have to hideIf we ignore the signals that mission control will send
It's just one big ship ride anyway, this hell will never end
We gaze out on what they left of the stars
All we see now, we can take as oursYou two've got just moments left to give
Come back now and we will let you live
Stay inside our blue protective eye
We won't let them take you, we won't let you dieMy baby spins propellants, my systems set to blow
She's at the milky way now, spelling into snow
And she's constructed flash points to cover up the sun
I sleep under glass, I know that she will wake me when she's doneYou two've got just moments left to give
Come back now and we will let you live
Stay inside our blue protective eye
We won't let them take you, we won't let you dieYou two've got just moments left to give
Come back now and we will let you live
Stay inside our blue protective eye
We won't let them take you, we won't let you die
