

Stupid Kid

Alkaline Trio

There are things that used to make me smile
One of them was you for just a little while
 You left me for dead so far away
 I replaced you with fear and shame
You'll be happy on the day I dieThere are things that used to make me laugh
 But now they're deeply buried in the past
 I left them there so far away
 Replaced my humor with my pain
I'll be happy on the day it diesRemember when I said, "I love you"?
 Well forget it, I take it back
 I was just a stupid kid back then
I take back every word that I saidThere are things that used to make you cry
 One of them was me for just a little while
 Why is it that you had to say?
 Goodbye in your special way
You slashed the tires on my carRemember when I said, "I love you"?
 Well forget it, I take it back
 I was just a stupid kid back then
I take back every word that I saidRemember when I said, "I love you"?
 Well forget it, I take it back
 I was just a stupid kid back then
I take back every word that I said
