

# My Brain Hurts

## Musical Suicide

Time gets wasted every day I watch the minutes tick away  
My brain is melting like a chocolate ice cream bar  
Like characters on TV these people look like maggots to me  
and I wonder what the hell is wrong with me  
Milk fed little beauty queen she's straight out of a magazine  
she sits beside me breathing different air than me  
The perfect generation sees that I'm infected with disease  
and everything just crumbles and there's nothing left  
If i wanna do something right I gotta do it myself or someone else will  
fuck it up It isn't all black and white and now it's time to stop and  
figure out reality No one knows what they're talking about  
if what they're talking about don't making any sense to me  
I gotta figure it out cause I don't want something to believe in
