

Ode To Star L23

We Are Scientists

Lost out in deep space, it's hard to know where we are.

Stuck out here someplace among the collapsing stars.

Holed up in my ship without a power source,

It's so dark I can't see this couldn't get any worse.

How can I be sure that all is accounted for?

You are the one shining bright as the sun and I'd love to turn you on if I could.

You are the one shining bright as the sun and I'd love to turn you on if I could.

Lost out in deep space, this is no place to be.

Stuck walking in place to wait for the rescue team.

Holed up in my ship it's hard to know what to do.

Oh I wish you were here so that I could look to you.

How can I be sure that I'll be accounted for?

You are the one shining bright as the sun and I'd love to turn you on if I could.

You are the one shining bright as the sun and I'd love to turn you on if I could.

This is an S.O.S.

(repeat 3x)

You are the one shining bright as the sun and I'd love to turn you on if I could.

You are the one shining bright as the sun and I'd love to turn you on,

yeah I'd love to turn you on,

yeah I'd love to turn you on if I could
