

No Future In The Past

The Alan Parsons Project

Yesterdays come easy
They're looking back at you
The sun will rise tomorrow
There's nothing you can do
It's the same old story
Coming 'round again
What is done is done now
You know you can't hold back the rain
And there's no future in the past
So take it slow, you're getting nowhere fast
You could be saving the situation now
You'd better run like the devil if you still know how
You know the tide is turning
It's got you on the run
Your last bridge is burning
No time for having fun
Time will wait for no one
To get their days work done
We're in this boat together
You know one and one and one ain't one
And there's no future in the past
So take it slow, you're getting nowhere fast
You could be saving the situation now
You'd better run
We've come a long long way
Maybe one day you'll see the light
But don't, don't let it die
Don't let it fade away into the night
Yesterdays come easy
They're looking back at you
The sun will rise tomorrow
There's nothing you can do
It's the same old story
It's coming 'round again
What is done is done now
You know you can't hold back the rain
And there's no future in the past
So take it slow, you're getting nowhere fast
You know you're getting nowhere fast

You could be saving the situation now
You'd better run like the devil if you still know how
No future in the past
So take it slow, you're getting nowhere fast
You know you're getting nowhere fast
You could be saving the situation now
You'd better run
