

You + Me

Poppy Brothers

i need to see the world before i get too old
i need to get with you before youre somebody elses girlwe could carry on as if weve known each other
forever though we just met
you could take me home and i could meet your mother
ill be your best friend
you and me are meant to be together forever im so happy
you and me are meant to be but in the meantime im so lonelyim not above begging for softness to get through
these hard times
i need to be somebodys star or i wont make it through the night
tell me you love me dont give up on me i know im mr. right
i wont control you i just want to hold you tight
