How This Felt

nolongerhuman

Can you feel me
Here where you left me
Can you see me
Here waiting for you
Are you listening
To another heartbeat
Making those promises
To someone else

Can you hear me
On the nights I wake
Screaming your name
Into an empty room
Can you blame me
For feeling this hatred
All the years wasted
I am left devastated

Come and share my suffering
Come and share my pain with me
Come and share these visions
Let me show you my version of hell

Come and share my suffering
Come and share my pain with me
Come and share these visions
Let me show you how this felt

Can you feel me
Here where you left me
Can you see me
Here waiting for you
Are you listening
To another heartbeat
Making those promises
To someone else

Can you hear me
On the nights I wake
Screaming your name

Into an empty room
Can you blame me
For feeling this hatred
All those years I've wasted
I am left devastated

Come and share my suffering
Come and share my pain with me
Come and share these visions
Let me show you my version of hell

Come and share my suffering
Come and share my pain with me
Come and share these visions
Let me show you how this felt

Let me show you
How this felt
