

Let's Start from Here

[Joanna Wang](#)

Giving up, why should I've come too far to forget
We're beautiful, we just got lost Somewhere along the way
So much was missing when you went away
Let's start from here, lose the past
Change our minds, we don't need a finish line
Let's take this chance don't think too deep
Of all those promises we couldn't seem to keep
I don't care where we go
Let's start from here Standing here face to face
A finger on your lips
Don't say a word don't make a sound
Silence surrounds us now
Even when you were gone I felt you everywhere
Let's start from here, lose the past
Change our minds, we don't need a finish line
Let's take this chance don't think too deep
Of all those promises we couldn't seem to keep
I don't care where we go
Let's start from here
Let's start from here
