

# The Real Thing (Wendy and Lisa Flow Jam Mix)

Gwen Stefani

I've seen your face a thousand times  
Have all your stories memorized  
I've kissed your lips a million ways  
But I still love to have you around I've held you too many times to count  
I think I know you inside out  
And we're together most days  
But I still love to have you around And you're the one I want and it's not just a phase  
And you're the one I trust, our love is the real thing Don't go away  
My love (my love)  
I want you to stay  
In my life  
Don't go away  
My lover (my love)  
I'm happiest when we spend time You're a salty water, ocean wave  
You knock me down, you kiss my face  
I know the storms will always come  
But I still love to have you around Heavens knows what will come next  
So emotional, you're so complex  
A roller coaster, built to crash  
But I still love to have you around You're the one I want and it's not just a phase  
You're the one I trust, our love is the real thing Don't go away  
My love (my love)  
I want you to stay  
In my life  
Don't go away  
My lover (my love)  
I'm happiest when we spend time (it's only you and I) It's you there when I close my eyes  
And you in the morning  
I never thought you'd still be mine  
Or I'd really need to have you around Don't go away  
My love (my love)  
I want you to stay  
In my life  
Don't go away  
My lover (my love)  
I need you, you're my love supply Don't go away  
My love (you're my love supply)  
I want you to stay  
In my life (every day, every night)

Don't go away  
My lover (you're my love supply)  
I need you, you're my love supply
