## Up All Night

## **Kip Moore**

I know the lights are out, I know it's getting late
But you're still young and we're wide awake
I've never seen a sky this damn bright
So don't go home, it just ain't rightI got a good idea, I got a wild head
There's a little spot and we could meet you there
Take the only road straight outta town
Until you see the fire, baby don't slow down'Cause we'll be up all night
Keeping up the moon
I just wanna dance, baby dance with you
We gonna scream and shout until sunrise
We won't close it down

We'll be up all nightBaby, grab some beers and we'll grab guitars

Tell all your friends and we'll ride the stars

We'll gas the fire, try to make it last

And we'll sing it up and you can shake your a\*\*And we'll be up all night Keeping up the moon

I just wanna dance, baby dance with you We gonna scream and shout until sunrise

We won't close it down
We'll be up all night
AlrightWe'll be up all night
Gonna feel so free

Only got one ride, don't need no sleep So baby, dance my way And I'll pass the wine

Wanna kiss your face

And stay up all nightWe'll be up all night

Keeping up the moon

I just wanna dance, baby dance with you

We gonna scream and shout until sunrise

We won't close it down
We'll be up all nightYeah
Up all night
