Drown (Acoustic Version) [Live]

Three Days Grace

Good morning day
Sorry I'm not there
But all my favorite friends
Vanished, in the air
It's hard to fly when you can't even run
Once I had the world, but now I've got no oneIf I needed someone to control me
If I need someone to hold me down
I would change my direction
And save myself before I,
If I needed someone to control me
If I needed someone to push me around
I would change my direction and save myself before I, drownGood morning day
Sorry you're not here
But all those times before
Were never this unclear
It's hard to walk when you can't even crawl
Once I had this world, but now I've lost it allIf I needed someone to control me
If I need someone to hold me down
I would change my direction
And save myself before I
If I needed someone to control me
If I needed someone to push me around
I would change my direction and save myself before IDrown, rolling faster then I'm breathing
Drown, rolling faster then I'm breathing
Drown, rolling faster then I'm breathingIf I needed someone to control me
If I need someone to hold me down
I would change my direction
And save myself before I
If I needed someone to control me
If I needed someone to push me around
I would change my direction before I, drown
