

# Underwater Bride

## Passenger

Help me stay awake, I'm falling asleep  
And I don't want to fall asleep while you're here  
You're going to leave, when the alarm clock beeps  
And it will beep any moment, my dear  
And all that we have will be locked into memory  
Like everything that we've had before  
So I will stay awake and I'll watch the fire burning  
And keep the hungry wolves from the door

Help me find my way back to the bread crumbs  
I've wandered alone through the trees  
The lights are dimming in the windows of the houses  
And my heart is starting to freeze  
See we have a light but we won't use it  
We're scared we'll lose it if we don't use it  
Then we'll die here in the dark

And they will find us, hopeless and helpless  
And clutching our frozen hearts  
And you and I, well we'll be buried side by side  
And time it won't mean a thing  
I'll be your underground groom  
You'll be my underground bride

Please can you help me keep my head above the water  
I have a cramp in both my calves  
Yeah, my lungs are filling up with cold dirty water  
But I have a sickness that is making me laugh

See we have a boat but we don't think it  
We're scared we'll sing it but we'll drink it  
If we never find that raft  
And we will sink down to the bottom of the ocean  
with the fishes that glow in the dark

And you and I, well we'll sink down side by side  
And time it wont mean a thing  
I'll be your underwater groom  
You'll be my underwater bride

And oh, the lights are fading my love  
And oh, the water's filling me up  
And ohoh, the lights are fading my love

---
