

Powder Blue

Vain

Don't you know it's a secret place somewhere you always hide alone you can ease the pain that you felt deep
inside

Powder Blue was the color of your eyes and of my dreams Along you would do it for you always do it for love
all for love Powder Blue you got lost do it for love Powder Blue Sleep away in your dreamy world Clouds just
keep flowing by Alone whose your best friend his name is Powder Blue While you hide you would do it for
love all for love Powder Blue you got lost do it for love Powder Blue Blue Blue Got my ticket on a big jet plane
should of known better but I had some pain

Now six hours later I was there for you but where you lost Powder Blue

Hay hay

Oh hay hay

Hay hay hay And there was still no way
