

Elephants

Warpaint

I'll break your heart
To keep you far from where all dangers start
And atmosphere

Gets crazy life
Where every breath transpires
And to a star
Space of calm about you

They call me a thief
They call me a thief
Call me a thief
Call me a thief
Common thief
Common thief
Common thief
Call me
Call me

So I know
That you're not that you're not here
Sort of lost without you
I hope
That you burn all there is that
You want is inside you now

I'll break your heart
To keep you far from where
All dangers start
I'm on my way
I'm on my way down

I know
That you're not that you're not here
Sort of lost without you
I hope
That you find all there is that
You want is inside you now

I know that

You're not here
I wonder where you are

In the dark we are waiting for you
We are waiting for you
With your dying need for
Their attention hold on right now
We won't let you fall

We are waiting for you
With your dying need for
Their attention hold on right now
We won't let you fall
