

# Ordinary Lives

## Wet Hair

There'll be one small light  
All over the world tonight  
The search will go on for the one  
It was love with no name and we glowed in the sun  
There was one small dream  
Incredible highs and lows  
What little we knew living ordinary lives  
Made a dream for you, living ordinary lives  
Ordinary people, living ordinary lives  
Ordinary people, living ordinary lives  
We were ordinary people, living ordinary lives  
We were ordinary people, living ordinary lives  
The clock on the wall keeps moving  
Time stands still  
No matter how the dice may fall  
Someone else always gets to call the number  
Say goodbye, cruel world  
No pity, no pain tonight  
Whatever the cost, all is lost  
And if it's love with no name, then it's all in the stars  
Whether it's wrong or right  
There's no one to blame, no lies  
What else could we do living ordinary lives  
Made a dream for you, living ordinary lives  
We were ordinary people, living ordinary lives  
We were ordinary people, living ordinary lives  
We were ordinary people  
What else could we do, living ordinary lives  
Made a dream for you, living ordinary lives  
We were ordinary people, living ordinary lives  
We were ordinary people, living ordinary lives  
We were ordinary people, living ordinary lives  
...
