

It Was You

Robbie Nevil

The two of us are different.
I do homework full-time.
And I like to play around.
But my homework can't hold me
On a cold dark night.
Then you can go to the school counselor
And love
And work that out
Yeah Let's stop pretending that we don't care
I'll be your carebear, go give you kiss there It was you all along and I never really saw
What was right there in front of my face
You're the one I miss,
That I wanna be with whenever you're away.
It was you,
It was you,
'Cause you're my one true love
It was you,
It was you,
It was you all along. You know me better than I even know myself,
You're the only one who understands
I didn't see this coming
But I like how it feels
And I never want it to end, oh no. It took some time to know what I need
The one that's really perfect for me. It was you all along and I never really saw
What was right there in front of my face
You're the one I miss,
That I wanna be with whenever you're away.
It was you,
It was you,
'Cause you're my one true love
It was you,
It was you,
It was you all along. I was such so blind,
It was when you were gone
That I finally realised It was you,
It was you,
With you is where I belong
It was you,
It was you,

It was you that I really want. It was you all along and I never really saw
What was right there in front of my face
You're the one I miss,
That I wanna be with whenever you're away.
It was you,
It was you,
'Cause you're my one true love
It was you,
It was you,
It was you all along.
It was you.
