

Fire Burning Love

Aaradhna

If you ask me
What our love's all about
I would say our love is like a flower
With the petals pulled out No one to try to put us down baby
Because I love you too much and
You love me too but
There's just some problems that we gotta work through time There's not much time
We gotta get it together today
Because tomorrow man, you never know Can we get it back like
Get back the fire
Burning love again Can we get it back like
Get back the fire
Burning love again Bittersweet memories
Of how we used to be
I know right now we're still together
But the fire and passion is gone It's killing me
Every day
Because our love ain't the same
And every night I pray please God don't take my baby away Oh time
There's not much time
We gotta get it together today
Because tomorrow man, you never know Can we get it back like
Get back the fire
Burning love again Can we get it back like
Get back the fire
Burning love again You used to hold me real close
And I didn't let go of you, just held on tight
But nowadays it feels like slowly
Your love is fading far away You used to hold me real close
And I didn't let go of you, just held on tight
But nowadays it feels like slowly
Your love is fading far away Fire burning love
