

# Center of the Universe

[Axwell](#)

The shadow of your smile  
Under the open skies  
As I close my eyes  
I can feel the wind arise We're made of stardust  
Our lives ahead of us We'll ride The magic bus into the heart of love I can taste it, taste the feeling of the blue  
skies they're for real and we're the center of the universe  
Just you and I, and I, and I
