

Simple Life

Green River Ordinance

I love the simple life, front porch and my lovers eye's
Green grass and an open sky, I love the simple life Born and raised by God's good grace
In a Texas town where life moves at a slower pace
I learned to work with my hands and say yes ma'am
and thats a part of me that'll never fade away I love the simple life, front porch and my lovers eye's
Green grass and an open sky, I love the simple life
Got my guitar and a Waylon tune,
ringing out under a southern moon
One thing thats always true, I love the simple life Got the grill smoke, good drink in my hand
A few friends on way and it'll sure be a fine night
Sun's hanging low, and I've got peace in my soul
and I think myself, God its good to be alive I love the simple life, front porch and my lovers eye's
Green grass and an open sky, I love the simple life
Got my guitar and a Petty tune
ringing out under a southern moon
One thing thats always true, I love the simple life All we need are the simple things
to see the world with open eyes
Arms to hold you close at night,
it always easy, but it'll be alright I love the simple life, front porch and my lovers eye's
Green grass and an open sky, I love the simple life
Got my guitar and a Willie tune
ringing out under a southern moon
One thing thats always true, I love the simple life Yeah its built for me and you, I love the simple life
One thing that's always true, I love the simple life
