Elevate Myself

Grandaddy

I don't wanna work all night and day
On writing songs that make the young girls cry
Or playing little solos on a keyboard
So the kids will ask me how and whyI just wanna, I just wanna

I just wanna elevate myself

I just wanna, I just wanna

I just wanna elevate myselfAnd maybe for a little

Get to where I find it really hard to hate myself

I just wanna, I just wanna

I just wanna elevate myselfI don't wanna stare at stacks of paper all the while

While the world goes by

Tradin' out the weather for a clever lyric

Written by an ikea light just wanna, I just wanna

I just wanna elevate myself

I just wanna, I just wanna

I just wanna elevate myselfAnd maybe for a little

Get to where I find it really hard to hate myself

I just wanna, I just wanna

I just wanna get up off the shelf and elevate myselfI don't wanna be a part of All the quality that falls apart these days

I'd rather make an honest sound

And watch it fly around and then be on my wayI just wanna, I just wanna

I just wanna elevate myself

I just wanna, I just wanna

I just wanna elevate myselfAnd maybe for a little

Get to where I find it really hard to hate myself

I just wanna, I just wanna

I just wanna elevate myself
