

# Speak Up

## Fightstar

Started running now  
But I can't see straight  
I can't communicate  
I swear we never will You will never make me break me down again So just please just understand  
I can take it away  
Our time is running out  
And I can see it in your I won't be there when you hit the ground You talk to me  
I swear you'll see Speak up with the words you just said  
When I'm falling down  
How do you know?  
How do you notice? Speak up, stop ignoring the fact  
That you let me down Just answer me, you know I need it all  
Yeah, you're holdin' inside  
You can't breathe in  
I swear you never will Fuck you all, I'll show you, now I'm gone You talk to me  
I swear we'll see Speak up with the words you just said  
When I'm falling down  
How do you know?  
How do you notice? Speak up, stop ignoring the fact  
That you let me down, just answer me We started running now  
But I can't see straight  
We started running now  
But I can't see straight We started running now  
But I can't see straight  
We started running now  
But I can't see straight We started running now  
But I can't see straight  
We started running now  
(We started running now) But I can't see straight  
(But I can't see straight)  
We started running now  
(We started running now)  
But I can't see straight
