

Middle of the Night (Ulysses Remix)

Lilly Wood & The Prick

Waking in the middle of the night, it's nothing but
Dark, And be side by side, it fells alright
You've got no more than a few years ahead of you
And it fells alright
You're not scared, scared You've got to do it, do it, do it
And take it, take it
You've got to have it, have it, have it
Now don't you think about it
Now don't you think about it Standing in the middle of the fight
It don't feel right
There's no one on your side
It don't feel right
There's not a place left to go and hide
And it don't feel right
Go escape, escape You've got to do it, do it, do it
And take it, take it
You've got to have it, have it, have it
Now don't you think about it
Now don't you think about it You've got to do it, do it, do it
And take it, take it
You've got to have it, have it, have it
Now don't you think about it
Now don't you think about it Think about it Now don't you think about it And it fells alright
And it fells alright You've got to do it, do it, do it
And take it, take it
You've got to have it, have it, have it
Now don't you think about it
Now don't you think about it You've got to do it, do it, do it
And take it, take it
You've got to have it, have it, have it
Now don't you think about it
Now don't you think about it Think about it
Think about it
