Rock My Body

The Higher

Go, Do what we know, don?t go
You move we don?t
---
now go
Now don?t you move we won?t go now don?t go go
I like the way that you move meant the way that she tasted
Like to rip these things right through her lips
Contemplating experience that left me here
This intoxicating kiss
But tonight, I?m setting all my memories aside

So why don?t we trace the footsteps back into our past with the ones we?ve lost?
Too many bad mistakes were made
No one should have to take the fall for it when it?s our life to live

Go, Do what we know, don?t go
You move we don?t
---
now go
Now don?t you move we won?t go now don?t go go
I like the way that he moved found out the way that he tasted
Then he ripped these things right from her lips
Never thinking the first time that they met would be the last she saw of him

Is clever an issue, a balancing reason
Are we all waiting to destroy?
The things in life we are made of a blessing were tasting
We?ve come so far to recreate
We?d like to build the expansion resembling patterns
Disguising everything and what we have to relive
And this all for this one dance

So why don?t we trace the footsteps back into our past, with the ones we?ve lost?
Too many bad mistakes were made
No one should have to take the fall for it when it?s our life to live

I am watching over you from the stars
Don?t be scared I know exactly where you are
Cause there?s a piece of me and it?s burning in your heart
Even that could never tear us apart
