

# Butterflies (VooDoo & Serano Edit)

## Kamaliya

You know I want  
I want it so bad  
I can't control it  
Can you take that  
Now boy you ready or not  
You better keep up, you gotta keep up, up, up, up I need your touch on my skin  
I want it tonight  
Tell me your secret, I'll keep it  
And you can have mine  
So put your hand on your heart  
And I'll do my part, and I'll do my part Baby all we got is right now  
I know we're gonna make it somehow  
If even only for just one night  
Chasing butterflies, butterflies  
Holding on until the sunrise  
Kept alive by the moonlight  
Never thought that we could get so high  
Chasing butterflies, butterflies -- chasing butterflies The music's fuel to the flame  
Our motivation  
We're calling out to the world and to every nation  
Let's come together as one -- now we can make it  
Yeah we can do it
