

# Company Town

## John Hughes

When I was a boy My Mama worked hard  
My Daddy worked the grave shift down In the ship yard  
In this company townWhen I went to school, I sat in the back  
Was there that I made my plan of attack  
To get out of this town  
Out of this Company town  
Company town, Company town, boyBut I got in trouble with a girl from school  
So we both got jobs and worked like mules  
In this company town  
In this company townOh I learned some lessons, though they mightve come slow  
Making a living and making a lifes Not the same you know  
Company town Company town, boy  
Company town Company town, boyI did my best to love her But it never did take  
So I dug right in for my kids sake In this company town  
In this company town  
We went to church And I drove them to school  
Everybody knows, you live by the rules  
In this company town In this company townOh I learned some lessons, though they mightve come slow  
Making a living and making a lifes Not the same you know  
Company town Company town, boy  
Company town Company town, boy
