Special Forces

Burning Heads

There's special forces inside my brain
That make me live and feel insane
You hate me now see my power
There's no escape cause I just lit the fire
Too late if you want to stay live
You want my head, you're gonna die
You're gonna to commit a suicide
Your head is burning, you start to cry
You should have stayed on my side..
Upside, on the ocean (???), there must be a way to breathe
No ??? like before
A place what you see is what you ???
?? and fuck on the rest
You just have to be yourself
